Airline Services Export Processing Zone  
Murtala Muhammed International Airport  
Ikeja  
Lagos

*Dear Sir,*

**APPROVAL TO EXTEND OPERATIONAL SITE OF AIRLINE SERVICES EXPORT PROCESSING ZONES IN PORT-HARCOURT**

We write to convey the approval of the Hon. Minister of State for the extension of your Operational Site of Airline Services Export Processing Zone in Port Harcourt, Rivers – State based on the earlier Presidential Approval.

You are advised to ensure compliance with the NEPZ Act 63 of 1992 as well as the laid down Operational Procedures and other Regulations governing Airline Services Export Processing Zone (ASL EPZ) activities in Nigeria.

Please contact the Zones and Technical Service Department of the Authority and arrange for suitable date for inspection of the proposed site before commencement and issuance of Operating License for the location.

**Congratulations!**

*Sina A. Agbolauje*  
**SINA A. AGBOLAUJE**  
**MANAGING DIRECTOR**

## ASL EPZE PROPOSED FACILITY AND SERVICES

The proposed site for the EPZE is a 27 hectare operating base in the Trans Amadi Industrial layout Port Harcourt Nigeria. The base will serve as the regional hub for ASL's network of operations and logistics centres and will represent one of the most secure integrated operational bases in the Gulf of Guinea. ASL in partnership with its international partners has designed the base to offer a complete range of integrated services designed to fully match all aspects of the operational environment in the Gulf of Guinea. The base is designed to provide our clients with secure integrated logistics solutions and strategic distribution hubs to service onshore and offshore fields as well as provide easy access to the Gulf of Guinea and sub-Saharan oilfield operating areas for a range of companies operating in the Oil, Gas and Process industries including

- E&P companies involved in upstream exploration and production, downstream refining and distribution
- Oilfield services companies and transit and supply base businesses.
- Project and Service contractors to the Oil and Gas Industries
- Operators and Contractors in Engineering and Process industries

The following represents a sample of available services within the bases 24/7 , 365 , Secure environment

## Benefits

### Integrated Security

The ASL EPZE Port Harcourt facility is a secure self-sufficient environment in partnership with our international risk management partners. The base security solution is designed to Deter, Detect, Delay, Respond, and Mitigate and prevent a full spectrum of threats and exposures. We will work with world class technical and operational vendors to provide a fully integrated spectrum of security solutions available for employment against any security problem set.

We understand the security challenges of operating in difficult environments. Our Operational Security and Transfer solution allows client the option of transporting personnel from international airports in Lagos or Abuja to the Base entirely by air. OST also provides project location to base support for clients.

Our EPZE Integrated live / work environment provides additional security by hosting all residential, office, recreational and industrial facilities in one fully secure domain. Personnel live, work and relax in a single location which allows for the efficient concentration of security resources for maximum impact and protection. Our approach means that we provide all required services within one environment including

- Office complexes
- Residential complexes
- Entertainment, sports and recreational complexes
- Shopping Complex
- Onsite Banking facilities
- Hotel and Guest facilities

### Integrated Operations and Logistics Infrastructure.

The EPZE Port Harcourt facility is a fully integrated self sufficient environment clients will have dedicated facilities from which to operate, with the added advantage of being able to satisfy their operational needs within the base. The base provides a complete range of onsite fully redundant facilities and utilities including

- Dedicated onsite 12MW gas turbine independent power plant,
- Dedicated onsite water supply and waste management systems,
- Dedicated onsite communications network for voice and data communications
- Fully secure living estate, office estate , training and workshop facilities catering facilities, and related amenities
- Dedicated transportation , warehousing centre, including dedicated Helicopter Landing Pad

### Integrated Services

Our EPZE Port Harcourt facility provides an integrated managed services environment for clients looking for specialist support in functions that are not core to their business. The base offers fully managed services across operations, logistics , engineering and production with a dedicated on site workforce of local and international sector specialists that will work in

close co-operation to build specialist and standardised solutions for clients with stringent quality and service levels.

### Flexibility

We are committed to offering service flexibility to its clients in a rapidly changing operating environment. Clients are able to choose from a package of predefined core services provided at client determined service levels relevant to the client requirements. We also has the flexibility to build and manage service requirements to client specification or provide infrastructure and support services for client configured and managed services. Potential configurations that are currently under development with clients for deployment within the base include

- Design , Build Operate and Lease of camp accommodation for an oil services company
- Contract manufacture of project equipment
- Ship to Warehouse logistics support
- In flight and off shore catering and housekeeping logistics.

### **Management and Partners**

Our Port Harcourt facility will be managed by an onsite dedicated team of Nigerians and Expatriates. The team will manage the provision and quality of services and co-ordination of the various service partners and clients operating within the base.

Our services will be delivered through a combination of our own dedicated teams and international partners that will provide specialist services to the base in key areas of Security , Engineering and Production Services and Air Transport Services.
